

GIS Committee Email Vote 10/15/2018

On 10/15/2018 at 9:02am - Commissioner Goulet sent out the following email asking for a vote on Item 1 and 2.

Members of the New Hampshire GIS Committee,

During our last meeting we charged the GTAC with producing an analysis of the pros and cons of funding a GIO position for New Hampshire. The intent was to provide us with the context to help make a decision as to whether we continue to pursue funding a GIO or not. The GTAC working group took it a step further (see attached) and is recommending that we:

1. Not fund a GIO position
2. Codify the existence and makeup of the working group as defined in the attached document

I am proposing an email vote so that I can quickly communicate the will of the committee to the Governor's Office.

I move that the GIS Committee adopt the recommendations of the GTAC working group as expressed in the attached document.

I am requesting a **SECOND ... Reply All Please**

After you see a second please send your vote **YES** or **NO** as a **Reply All** as well. If there are matters for discussion please send those to all as well.

We will publish the results on the GIS Committee web site.

Thank You,

Denis Goulet

Commissioner / Chief Information Officer
NH Department of Information Technology

Assistant Commissioner Bailey seconded on 10/15/2018 at 9:12am

15 votes for and 1 against, were received by email and no additional matters for discussion were brought forward

The motion not to fund a GIO and to codify the existence and makeup of the working group as defined in the GTAC Working Group Response to Commissioner Goulet's request for discussion of a state GIO position has passed.
